## **All Goji Juices are NOT created equal!**

**Thinking of Trying to Save a Buck? Read On...**

There are many varieties of goji – as many as 41 species in Tibet alone! In the same way that human fingerprints can be used to distinguish one person from another, a spectrometer can detect even subtle differences between berries at the molecular level. This technique results in the generation of a graph – a Spectral Signature.

FreeLife® is the only company in the world to have developed a Spectral Signature to identify, isolate, and harvest only those special goji berries with the exact nutrient profile of the legendary goji from the Himalayas.

**Please note that these points are not in any particular order ... not one is more or less important than the other!**

**This information has been made available to you, the consumer, to assist you in making an educated decision. The ultimate choice is yours...**

**~ BUYER BEWARE ~**

### **Himalayan Goji Juice - Our Juice (HGJ)**

### **Goji Juice - The Other Juice**

Our [HGJ](#) is backed by scientific research and evidence and is exploding. One new study becoming available each month. The studies are not from FreeLife, but from the world.

Is the juice you're considering purchasing and drinking backed by scientific research and evidence?

It took [Dr. Earl Mindell](#) almost 10 years to bring our [HGJ](#) to production.

Is the juice you're considering purchasing and drinking truly a production of it's own company?

[Dr. Earl Mindell's](#) name stands behind our [HGJ](#).

What doctor's name stands behind the juice you're considering purchasing and drinking?

Our [HGJ](#) is cold processed (which maintains all nutrients in their natural state) and not **heat** processed (which destroys nutrients).

How is the juice you're considering purchasing and drinking processed?

There is a patent on our [HGJ](#) processing - one **CANNOT** patent a natural product. Anyone who spends the time and money to patent anything means business.

Is the company you're considering purchasing your juice from making claims their product is patented? Do you know that a natural product **CANNOT** be patented?

Our berry (Lycium Barbarum) has 4,000 years of history.

How many years of history does the berry in the juice you're considering purchasing and drinking have?

Our berry (Lycium Barbarum), is the original [Himalayan Goji](#) berry.

I've seen Tibetan Lycium G. Barbarum and Lycium Eleagnus Barbarum on other sites. What do you suppose these berries are?

ORAC level of HGJ not important as antioxidants have been around forever. It's the 4 unique polysaccharides, or phytonutrient compounds (glyconutrition), in the [HGJ](#) that work in the body as directors and carriers of the instructions that cells use to communicate with each other. These polysaccharides are "Master Molecules" that command and control many of the body's most important defense systems.

Is the juice you're considering purchasing and drinking solely based on antioxidants? Does this juice also contain the 4 unique polysaccharides (master molecules)?

Our [HGJ](#) comes with a 100% 90-day, send-back-the-empty-bottle(s), guarantee.

What kind of guarantee are you getting? I've only seen 30-day money back guarantees from other juice companies.

Results come very quickly with our [HGJ](#).

I haven't heard this from anyone else drinking any other juice.

Our [HGJ](#) is super charged glyconutrition - it doesn't compare to any juice or anything.

Is the juice you're considering purchasing and drinking super charged glyconutrition? Seriously, what are you comparing this juice to?

Each bottle of our [HGJ](#) is 92% goji juice (Lycium Barbarum), 3% water and 5% grape, apple and pear juice.

What's the percentage of goji juice in the bottle you're considering purchasing and drinking? I received a response back from another juice company telling me, "the juice blend we produce is 50% pure Goji juice - it is just pure juice that contains all the healthful properties of Goji Berries "Lycium Eleagnus Barbarum" - the true Goji Berry." **Excuse me, but the 'Lycium WHAT Barbarum' berry? humm I wonder what the other 50% of their juice is.** Did you know there are 41 species of Goji berries and some don't even offer health benefits whatsoever.

Each bottle of our [HGJ](#) is 1 liter or 33 ounces.

Claims on other sites are saying our bottles are only 24 ounces and their bottle is 32 ounces.

Each bottle of our [HGJ](#) wholesales for \$34.95, and each case wholesales for \$129.95. Remember, we have 92% true goji juice (Lycium Barbarum) in each bottle.

I've seen the price for one bottle on some sites to be \$29.95. That is only \$5 off from having the original Goji Juice with the man and science behind it. And for almost 50% less goji juice per bottle? So what exactly are you paying for with the other brand of juice?

Some of the money we charge for our

Some of the money we charge for our [HGJ](#) is in the bottle. Our bottle is pharmaceutical grade.

Theirs, I guarantee, is cheap plastic that can add or degrade the quality of their juice.

The shelf life of our [HGJ](#), once opened and kept refrigerated, is two weeks.

What's the refrigerated shelf life of the juice you're considering purchasing and drinking? I've seen some juice sites claiming 90 days! Makes me wonder what else is in their bottle they're not telling us.

7.5 cases of our juice in referrals equals a free case.

You may be able to get free shipping and no tax from some merchants, but you'll never, ever get free product.

Every bottle of our [HGJ](#) contains the Spectral Signature that shows assurance of potency, purity and authenticity that the berries in our juice are the very berries that studies and science backs up as having health benefits.

Does the juice you're considering purchasing and drinking contain any indication to assure potency, purity and authenticity?

Our [Himalayan Goji Juice](#) tastes delicious. If you're used to 100% fruit juice, you'll love the taste.

I have a customer who just switched over to our [Goji Juice](#) but was drinking a different brand. She said that their brand did not taste very good and called me when she got ours and said our [Goji](#) tastes 10 times better!

Do your own research. Go to [www.pubmed.org](http://www.pubmed.org) and type in the official name of our [HGJ](#) berry (Lycium Barbarum). It will present you with numerous scientific and medical information.

Do your own research. Go to [www.pubmed.org](http://www.pubmed.org) and type in the official name of the berry of the juice you are considering purchasing and drinking. How does the scientific and medical information you receive compare to Lycium Barbarum?

**Order our [Himalayan Goji Juice](#) online [here](#) or call us TODAY at 888-895-9668!**
